Career Objective

Highly motivated and disciplined Software Engineering student at Rwanda Coding Academy seeking opportunities to further develop technical, analytical, and problem-solving skills through internships, research projects, and collaborative technology initiatives. Passionate about building impactful, scalable, and socially relevant software solutions, particularly in education and community-driven systems.

Personal Profile

Motivated and disciplined software engineering student with hands-on experience in software development, embedded systems, and teamwork-based projects. Actively involved in hackathons and academic projects, demonstrating adaptability, creativity, and a strong willingness to learn. Known for persistence, attention to detail, and a collaborative mindset when working in team environments.

Education

Rwanda Coding Academy (RCA) Program: Software Engineering **Duration:** 2024 – Present

Relevant Coursework

- Data Structures and Algorithms
- Object-Oriented Programming
- Database Management Systems

- Web Application Development
- Computer Networks
- Embedded Systems Fundamentals
- Software Engineering Principles

Technical Skills

Programming Languages

- C, C++, Java, Python, JavaScript

Web Development

- HTML, CSS, Tailwind CSS, Next.js

Databases

- MySQL, PostgreSQL

Embedded Systems

- Microcontrollers, basic electronics, MicroPython

Tools & Platforms

- Git, GitHub, VS Code, Canva

Other Skills

- Problem solving, teamwork, debugging, logical thinking, documentation

---

Projects

Education Management System

- Designed and developed a system to manage educational information and user roles
- Implemented system logic, interface components, and database interactions
- Strengthened understanding of full software development lifecycle, from planning to testing

LankaStay

Participated in developing a technology-based solution under the LankaStay project

- Collaborated with team members to design system features and workflows
- Contributed to planning, implementation, and evaluation phases

NeuroScore Hackathon Project

- Participated in the NeuroScore Hackathon as a team member
- Contributed to idea formulation, system design, and implementation
- Improved skills in innovation, teamwork, and working under strict time constraints

---

Experience

Student Projects & Practical Training

- Worked on multiple academic and personal software projects
- Applied software engineering concepts to real-world inspired problems
- Collaborated with peers using Git and GitHub for version control
- Practiced agile-style teamwork, task division, and peer code reviews

---

Hackathons & Competitions

 NeuroScore Hackathon – Team Participant

- Focused on problem analysis, system ideation, and prototyping
- Gained exposure to competitive innovation environments

Leadership & Teamwork

- Active participant in group-based academic projects
- Contributed ideas, technical input, and documentation in team settings
- Demonstrated responsibility in meeting deadlines and supporting teammates

---

Certifications & Trainings

- Software Engineering Training – Rwanda Coding Academy
- Ideation and Prototyping certificate
- Hackathon Participation – NeuroScore
- PISA participant 2024 – Ecole Des Sciences Byimana
- ILead Participation – Rwanda Coding Academy
- Wavumbuzi Participation – Rwanda Coding Academy
- Debate Participant –Rwanda Coding Academy

Community Engagement & Extracurricular Activities

- Participated in student-led technology initiatives and collaborative learning sessions
- Engaged in peer-to-peer knowledge sharing and group study activities
- Interested in community-focused technology solutions

Research & Learning Interests

- Software architecture and scalable systems
- Embedded systems and IoT applications
- Educational technology platforms
- Emerging technologies and continuous learning

Languages

- English – Good
- French - Good
- Kinyarwanda – Native

Interests

- Software development
- Embedded systems
- Learning new technologies
- Solving real-world problems using technology
- Sports
